K2 International, LLC

Introducing K2I and moladi

K2I is proud to be teamed with **moladi**, an award-winning construction system which has redefined the approach to affordable building. With its novel low-tech approach, it produces a high quality, durable system. A Project Manager, using unskilled workers, can complete a basic housing unit in days. **moladi** is extremely affordable and greatly reduces the costs on construction--and time. Used in cookie-cutter progression, each mold can be used up to 50 times: another cost saving. Moladi has been in existence for more than 35 years and is currently being utilized in over 26 countries worldwide.

Helping to create indigenous jobs: simple, safe, solid, and secure; earthquake resistant, utilizing common building materials, it is suitable for multiple building uses. It is easily transportable and fast.

K2I Hospitality

Our accommodation and facilities are styled to meet western standards and services major US and European defense companies, Fortune 500 companies and numerous high-level NGOs. Located in the International Zone, our compound is close to most Iraqi ministries and embassies. We offer a low profile secured location with 24/7-armed security.

DoJo's, the K2I restaurant - reviewed in many international publications – is located inside the K2I compound and has been deemed "*the place to be in the IZ*".
